ANDRÉ MORASSUT

TECHNICAL MANAGER / SENIOR FULLSTACK DEVELOPER

PROFILE

Motivated and accomplished senior software engineer and technical manager, looking forward to contributing to build, launch and maintain digital transformation projects and strategic applications.

I currently lead two teams (20+ people) for Inetum, a major French software editor.

I worked on the development and successful launch of many medium and large applications, in human resource management, finance and more, aimed at the French public sector.

I'm focused on bringing value to the customers in accordance to the business strategy - using pragmatic approaches, innovation and craftmanship. I have excellent written and oral skills, a keen eye for UX, and am a team player

WORK EXPERIENCE

2015 – present : Inetum
✎ **Technical manager & architect** *2017 – present*
I manage two teams of developers, QA and analysts (20+ people in France and Morocco) - leading to the successful deployment of two large HR applications for many major French public administrations.
✎ **Senior fullstack engineer** *2015 – 2017*
In a team of 3 experts, I worked on the building and industrialization of a fullstack framework around AngularJS and JEE to support the development of large business apps. This framework is supported and used in several products.

2014 – 2015 : University of Montpellier
✎ **Stand-in teacher** *2014 – 2015*
Teaching JEE, Maven and CI principles to 100+ students in the M2 "AIGLE" (Software engineering and architecture).

2004 – 2015 : Berger-Levrault
✎ **Technical Architect** *2010 – 2015*
Successfully worked on several architecture projects, developed feature projects for select clients and senior management (java JEE, JavaScript, Android, Gwt)
✎ **Senior developer** *2007 – 2010*
With another engineer, built a fullstack framework (java JEE, Spring, Android, Gwt, jUnit), used since for all the company new developments. Focused on the front-end part and the testing facilities.
✎ **Developer** *2004 – 2007*
Worked on critical components of two major applications, proposed and established unit testing, better Db design rules (java JEE, Swing)

2003 – 2004 : Sumotori Networks
✎ **Developer**
In a team of 4, worked on the development from scratch of a medical application (JavaScript, HTML, C++, DirectX MFC)

SKILLS

Technical: Angular, JavaScript, CSS, HTML, NPM / NodeJS, Jasmine, Java JEE, Spring, Maven, jUnit, SQL
Soft skills: Excellent oral and written skills, Agile development, Lean management certified, team player
Languages: English, French, Portuguese
